

Resume

Name: Daniel Carter

Email: daniel.carter@email.com | Phone: +1-555-0134 | Location: Toronto, Canada

Education

University of Toronto
BSc Computer Science & Statistics
2019 - 2023
GPA: 3.8/4.0

Imperial College London (Exchange)
Data Science Programme
2022

Technical Skills

Programming: Python, Java, SQL, C++
Data Science: Pandas, Scikit-learn, TensorFlow, Statsmodels
Finance: Time series analysis, portfolio optimization, risk modeling
Tools: Git, Docker, AWS, Linux

Projects

Algorithmic Trading System (Crypto Markets)

- Designed momentum-based trading strategy using multi-timeframe signals
- Built backtesting engine with transaction cost and slippage modeling
- Improved Sharpe ratio by 35% through volatility scaling

Credit Risk Scoring Model

- Developed logistic regression and XGBoost models for default prediction
- Performed feature engineering on 500K+ banking records
- Achieved AUC of 0.91 on validation set

Stock Portfolio Optimization Dashboard

- Built interactive dashboard using Streamlit and Python
- Implemented Markowitz mean-variance optimization with constraints
- Integrated live Yahoo Finance data pipeline

Internship Experience

Goldman Sachs (Summer Analyst)

- Supported quantitative research team in factor model development
- Built Python scripts for data cleaning and signal generation
- Assisted in performance attribution reporting

Amazon Web Services (Data Engineering Intern)

- Developed ETL pipelines for large-scale log data processing
- Optimized SQL queries reducing runtime by 40%
- Built monitoring dashboards for cloud usage metrics

Additional Information

Languages: English (Native), Mandarin (Conversational)

Interests: Quant trading, machine learning, distributed systems
